

ODD AND EVEN

What is Odd and Even?

- All numbers are either odd or even.
- When a number is even, it can be split into two sets without any leftovers.
- When you split a number into two sets and there is one left over, that means the number is odd.

How to figure out odd or even:

1. You have 4 pieces of candy.

- You

- You each receive 2 pieces of candy.
- That means **the number 4 is even.**

2. Now, try splitting up 5 pieces of candy.

- There is one piece of candy leftover.
- This means there is an odd amount.
